**PCI Embedded announces availability of a VXS Card Cage
Jackson, California, September 17, 2008**

PCI Embedded Computer Systems, Inc. announces availability of a 21 Slot VXS card cage.

6U 21 Slot VXS Card Cage

The **VXS Card Cage** adds VITA 41 high performance switched fabric capability to VME64X based systems. Designed for high speed applications of data acquisition and military / aerospace test and instrumentation, it combines superior mechanical quality with the low noise power supply technology. Featuring microprocessor controller power supplies and fan trays it provides advanced integrated diagnostic and monitoring capabilities.

The **6U VXS Card Cage** is:

- 19" x 11U enclosure for 21 6U x160mm cards for VXS / VME64X, and VME
- Mechanics fully compliant with IEEE 1101.10/P, advanced EMC / ESD shielding
- Very rugged steel-aluminum construction
- Monolithic 21 slot 6U VXS backplane according to VITA 41 standard. 2 Switch Card slots, 18 Payload slots, 1 legacy VME J1/J2 slot
- Fan tray designed for superior cooling of modules
- Power Supply options up to 3KW

Systems are available now.
